Performance Optimization

Profile Summary

- Final year B.Tech Computer Science Engineering student with a strong foundation in both front-end and back-end development.
- Proficient in modern web development technologies including React, Node.js, Express, HTML, CSS, and JavaScript.
- Experienced with containerization tools like Docker for developing and deploying scalable applications.
- Basic knowledge of cloud computing platforms, enhancing the ability to work on distributed systems.
- Regularly practices Data Structures and Algorithms in Java, ensuring efficient and optimized coding solutions.
- Demonstrates excellent problem-solving skills and the ability to debug and resolve complex issues.
- Adaptable, collaborative, and eager to continuously learn and apply new technologies.
- Committed to delivering high-quality, maintainable, and efficient software solutions.

Academic Projects

PROJECT NAME PortFolio

Tools: React, JS, CSS

Roles: Front-End web application, Deployment

PROJECT-DESCRIPTION

"Dynamic and innovative full-stack developer proficient in React, Node.js with a solid foundation in HTML, CSS, and JavaScript. Experienced in building responsive web applications. Skilled in containerization and deployment, with a keen interest in cloud computing and algorithm optimization. Passionate about creating elegant solutions to real-world problems and dedicated to continuous learning and growth."

PROJECT NAME:BlackJack Web Game

Tools: HTML, CSS, JS

Roles: Front-End Developer, Deployment

PROJECT-DESCRIPTION

"Interactive web developer with a knack for gaming, offering a captivating online Blackjack experience. Crafted using React for a seamless user interface and Node.js for a robust back-end. Delivers an engaging gaming atmosphere with smooth animations and intuitive gameplay. Complemented by HTML, CSS, and JavaScript for dynamic elements and responsive design. An exciting blend of technology and entertainment, ready to thrill players of all levels."
